Claude Viallat

Open since 1986 with an exhibition of François Morellet, the Oniris Gallery became over time been a major place for contemporary art in the western part of France.

For 30 years, the history of the Oniris gallery reveals the special attention given to the study of contemporary art in the field of abstraction – by painting, drawing and sculpture – with a philosophy consisting of exhibiting regularly recent works from a group of twenty nationally and internationally recognized artists.
